DANCE THEATRE OF HARLEM
FACILITY HEALTH AND SAFETY PROTOCOLS
FOR THE GENERAL PUBLIC

The health, safety, and well-being of our artists, staff, students, families, and visitors continues to remain our top priority. Our guidelines were developed based upon recommendations from the Center for Disease Control (CDC), Reopen Dance, New York State and New York City Health Departments, and in consultation with medical advisors. The follow protocols are subject to change at any time in response to new guidance and regulation from local, state, and federal agencies as those updates become available. **All individuals visiting the DTH Facility are expected to follow the guidelines outlined in this document at all times.**

Individuals aged five (5) and older will need to show proof full vaccination to enter the building and to participate in any building activities. As outlined by the CDC, people are considered fully vaccinated: **two weeks after their second dose in** a two-dose series, such as the Pfizer or Moderna vaccines, or **two weeks after a single-dose vaccine,** such as Johnson & Johnson's Janssen vaccine. You can read about New York City’s Vaccine Mandate for Private Businesses [here](#). The only exception to this rule are individuals entering the DTH Facility for a quick and limited purpose.

Individuals will conduct a health screening each day they visit DTH Facilities. Screenings will be conducted on site via paper screening or electronically using the [HealthCheck app](#).

Individuals entering DTH Facilities must be masked. Upon entering the building, everyone should rub their hands with sanitizer before touching any surfaces or items. Individuals will also undergo a temperature check before accessing any other areas of the DTH Facility. Anyone registering a temperature of 100.4 degrees or higher will be asked to leave the building.

Individuals must remain masked in common areas at all times (common areas are defined as lobby, stairways, common bathrooms, any space directly outside of studios, elevator, hallways/walkways).

Individuals will follow all guidelines and signage within the DTH Facility regarding occupancy in elevators, bathrooms, and common areas, as well as traffic patterns when arriving and exiting the building.

DTH asks all individuals in our facility to practice good hygiene including washing your hands frequently with soap or use hand sanitizer. Avoid touching your eyes, nose, and mouth. Cover your cough or sneeze with your elbow, shoulder, or a tissue.

If anyone is feeling sick, they should stay home and contact their health provider or local health department. You can learn more about COVID-19 symptoms [here](#).

As the pandemic continues to be an ever-changing situation, DTH may update the guidelines as needed at any time.
